

THE BUILDING BETTER DREAMS FACILITIES PROJECT

The Facilities Project will build three new elementary schools and make significant upgrades to the high school science labs, auditorium, pool, and Sidney Frohman Planetarium. The Facilities Project is the result of a recently passed bond issue in which Sandusky voters approved Issue 12 at a 57% passage rate. The state of Ohio is contributing 64% to the building cost of the project.

SANDUSKY CITY SCHOOLS
BUILDING PROGRAM**

An August 2017 Update from Lesko Architecture

Design of the New Schools

We are well into the Design Development Phase where we complete the design and detailing of each buildings' architectural elements and the mechanical, electrical, plumbing, and structural systems. We are completing building sections and specifying materials and finishes. Our team has completed the drawings and specifications for the demolition of Ontario School and the Construction Manager is in the process of receiving bids from contractors to complete that work. In addition, the Hayes 3-6 School site plans have been approved by the City Planning Commission which is an important step in getting the project ready to begin work on the site in October. Site plans for the Ontario and Hancock Schools will be submitted to the Planning Commission in September for approval.

Renovations to Sandusky Middle School and High School

The Auditorium stage relief air venting system and roofing construction work is on schedule and almost complete. Program development and designs of the other renovations, including Science Rooms, Rooms 300/301, Natatorium, and Planetarium are progressing in order to begin construction next summer.
