**AN UPDATE ON THE
SANDUSKY CITY SCHOOLS
BUILDING PROGRAM**

A July 2017 Update from Lesko Architecture

Design of the New Schools

We are happy to report that the project is moving along on schedule. The team has finalized the design of the buildings and presented three-dimensional images of all three schools. The Schematic Design documents were completed on June 1 and we are currently in the Design Development Phase. During this phase, we use the Schematic Design documents and we take them a step further, adding more detail. During this phase we design and lay out all of the site utilities and the mechanical, electrical, plumbing and structural systems. We also develop the architectural details, such as wall sections and specify types of building elements including all materials and finishes. In addition, we have submitted the Hayes 3-6 School site plans to the City Planning Commission for approval and we are anticipating beginning work on the site this year in the middle of October.

Renovations to Sandusky Middle School and High School

Construction work has begun on the Auditorium stage relief air venting system and roofing which will be completed in early August. We are continuing to develop the scope and designs of the other renovations, including Science Rooms, Rooms 300/301, Natatorium and Planetarium to be ready to begin construction next summer 2018.
